Stage 1 Announcements

SASFF Institutional Nominations 2026

Institutional Representation and Eligibility

Read before institutions designate their representatives:

All conference delegates who registered and checked in have been captured and are assumed to be eligible members in good standing for this process. There are 34 institutions represented at the conference: 25 Universities and 9 TVET colleges. Each institution must designate one authorised representative for the Stage 1 nomination ballot.

Candidate Consent and Representative Capture

Read while representatives are being recorded:

Before selecting any candidate, confirm that the person is present and wishes to stand for nomination. Each institution must submit its authorised representative's full name, institution, sector, email address and cellphone number to the facilitator. The Stage 1 nomination ballot will open only after one authorised representative from each of the 34 represented institutions has been captured and verified.

Nomination Rules and Confidential Access

Read after the voter register and ballot are approved:

Each authorised institutional representative will receive a unique and confidential email link, secure URL or QR credential. It must not be shared. University representatives must select at least one and no more than six candidates for the General Board. The General Board candidate list may include eligible University or TVET candidates.

Nomination Rules and Confidential Access

Continue reading:

TVET representatives must also select at least one and no more than six candidates for the General Board, and must select at least one and no more than two TVET candidates for the two TVET Representative positions. The highest General Board total determines the Chairperson, the second-highest determines the Deputy Chairperson, and ranks three to six determine the four additional Board Members. The Board will allocate the remaining portfolios when the Chairperson convenes the first Board meeting. Review every selection carefully. Once submitted, a ballot cannot be changed and its credential cannot be used again.

Voting Opens

Voting for the SASFF Stage 1 institutional nominations is now open. It is scheduled to close automatically exactly two hours after this opening. If every authorised representative submits earlier, the ballot may be closed manually only after the Election Official verifies completion and approves closure. Election enquiries may be sent to info@sasff.co.za

Voting Closes

Voting in the SASFF Stage 1 institutional nominations is now closed. No further ballots will be accepted. The Administrator will secure and export the election results and audit records. The result will be checked against the approved appointment and tie rules before any official outcome is announced.

Second Phase Tie Ballot

Use only after approval:

The verified result contains a tie affecting [position or appointment]. A second-phase tie ballot limited to the tied candidates will open at Friday, 11 September at 1pm and close at Friday, 11 September at 2pm. Every registered and checked-in eligible member who is present may vote in the tie-breaker. Each eligible delegate will receive a new confidential credential through the verified contact details captured at registration. Review the selection carefully because a submitted tie ballot is final and cannot be changed or used again.
